Liquid PURT

Liquid PURT is a two-part odor-destroying oxidizer that is unmatched in the cleaning industry. Liquid PURT is specifically designed to handle the most difficult odors. Like PURT II, Liquid PURT can also be used to treat a wide array of other offensive odors.

Liquid PURT is just as effective as PURT II but demonstrates a few additional advantages. Liquid PURT is easier to mix, and has a reduced risk of leaving a white residue behind. Additionally, Liquid PURT can be mixed in smaller quantities allowing for the treatment of just a few spots when needed.

Because urine damages carpet and Liquid PURT is an oxidizer, color loss is possible and may not be predicted ahead of time. Make sure you gain the customer's approval and be sure to have the customer sign a waiver or disclaimer before you begin the odor removal process. If you are treating urine or other odors on natural fibers such as wool, cotton, or silk, use PURT for Wool to reduce the risk of color loss.

It's important to communicate to the customer that the urine odor will get worse before it gets better as Liquid PURT breaks down the urine crystals through oxidation and that the odor will not be completely gone until the treated areas are completely dry. Add one cup of Chem-Dry Fragrance to a gallon of ready-to-use Liquid PURT to help mask the off-gassing urine odor.

Shelf Life

Liquid PURT has a shelf life of 1 year while stored in the dark bottles. Once mixed, the product has no shelf life and the product must be used immediately.

Product Safety

For professional use only. Read all directions including caution statements and SDS before using this product. Keep out of reach of children. Use only as directed. Use in well-ventilated areas. Do not take internally. Avoid eye contact and prolonged contact with skin – may be irritating. If eye contact occurs, immediately flush with water for 15 minutes. In case of skin contact, flush with water. If irritation persists, seek medical attention. If ingested, drink plenty of water and seek medical attention.

See SDS in the Safety Data Sheet section of this manual for additional safety information.

Liquid PURT

Item #
C034-A & C034-B

MIXING & APPLICATION INSTRUCTIONS

Dilution:

To make 1 Gallon, add 1 ½ cups of Part A and 1 ½ cups of Part B then add water to the 1 gallon mark (13 cups) Mix thoroughly by shaking or stirring.

To make 1 Quart, add 3/8 cup Part A and 3/8 cup Part B to a container then add water to bring the total volume to 1 quart. Mix thoroughly by shaking or stirring.

Application:

1. Locate the affected areas using two of the following methods. A high-powered ultraviolet light, your nose, or a moisture meter.
2. Sanitize the affected area if desired
3. Rinse or clean the affected area thoroughly.
4. Apply Liquid PURT to the affected areas and force it into the backing to ensure direct contact with all of the odor source. As a rule of thumb, use twice as much PURT as there is urine in the carpet.
5. Lightly extract if necessary but leave the area wet enough that it will stay wet with Liquid PURT for at least 24 hours.
